

Lab: Sample Free Style Job Instructions

Pre-Requisites: -

Jenkins server should be set up. If already set up, take the IP dedicated for your group. If not set, please coordinate with trainer for the same. Use the credentials provided by Trainer for login into Jenkins

Steps to follow: -

1. Login using your credentials in Jenkins on browser using URL: `http://<jenkins master server ip>:8080/`
2. Click **New Item** link on left panel
3. **Enter an Item name** like `<yourname>_firstjob`
4. Select **Freestyle project**
5. Click **OK**

Job Details screen should be displayed.

6. Enter **Description** such as "This is first free style project created by <Your name>"
7. Scroll down, under **Build** section, Select **Add Build Step** = "Execute Shell"
8. Enter **Command** as `echo "Hello <Your Name>, Welcome to Jenkins world !!"`
9. Click **Save**

Congratulations!! Your First Jenkins Project is created.

10. On Left Panel, click **Build Now** link;
11. Click the link "**# 1**" under left panel section **Build History**
12. Click **Console Output** link
13. View the log.

It should display your hello message and Finished: SUCCESS
